1. Spring
2. Summer
3. Fall
4. Winter
5. Stories have been written -- plays have been staged and audiences have chosen their favorite performers. But here is a new kind of star, The Fordson Tractor, one whose power to do things will thrill you all.
6. Over the hills to a successful harvest.
7. Every Fordson is a power plant and every wise owner is giving it a full year's task to perform. For instance -- in the cotton country of the South ---
8. -- Furnishes the power for the cotton gin --
9. -- And hauls it to the wharf for shipment.
10. Then there is the rice so tedious for some to raise.
11. In the rice fields of Louisiana and Texas the Fordson pumps the water for irrigation and cares for the rice until it is old enough to be separated.
12. In the hot dry climate irrigation is necessary. A ditcher cuts the ditch for the water to flow through.
13. A Fordson pumps the water.
14. And soon the ditches are filled with enough water to make the plants think they have been visited by a cloudburst.
15. A suggestion in caring for trees. The tractor furnishes power for mixing the liquid and pumps it out through the sprayer.
16. Draining the New Jersey mosquito meadows with ditcher and tractor.
17. "Ye Golfer's green" must be kept trimmed. Watch the Fordson cut down all scores for grass cutting.
18. Ever stretch your wire fence this way?
19. Guided by the Sculptor's master hand the compressed air chisels are busy creating a monument --- the Fordson supplies the compressed air.
20. Some telephone companies move their cables by Fordson power.
21. Scraping a mountain road near Denver, Colorado.

SEP 27 '22 ✓

- way
22. High/construction is the progressive step of the nation and here we find the tractor one of the leading factors.
  23. Gravel is collected in a very novel manner.
  24. The Ford One-Ten Truck with a special dump body assists the Fordson.
  25. Laying a gravel driveway on the premises of a great industrial plant.
  26. Machine shops are often operated in this manner.
  27. Clay suitable for brick making is also gathered in an interesting way.
  28. In Albany, Oregon, the Fordson plays fire horse and indidentally saves the town the expense of an \$18,000 fire truck.
  29. Many of Oklahoma's oil wells are drilled in this manner.
  30. Perhaps this will suggest another use for the Fordson to you.
  31. Bringing in the imports of some distant land on Seattle's docks.
  32. In the various lumber districts of the U. S., our old friend is more than doing its share of work.
  33. Operating as a locomotive the Fordson has saved many dollars for this lumbering concern.
  34. Furnishing the power for the saw mill.
  35. A handy fellow to have around a lumber yard.
  36. Fardown below and away over in the state of Pennsylvania another step is being taken to ward off Winter's cold.
  37. Here Winter is, dressed in blizzard's cloak --- but still the Fordson teils to make our lives more happy.
  38. So let us remember as we look upon the tractor at work in its rural surroundsings ---
  39. --- that here is a useful power ready to be put to work at something else as soon as the farming's done.

THE END.
